

Danish Business Seminar

Join the Danish business seminar that brings insights into the work in the Danish water sector. You will hear about ways of achieving as low as **6% Non-Revenue Water**, reaching as high as **197% of wastewater energy production**, mapping the water reservoirs of the whole country, reducing CO₂ emissions and combating climate change.

When: Tuesday, October 11 at 15.15-17.15
Venue: Business Forum Room, Room 2

Programme

15.15-15.30 Welcome and introduction to the strongholds of the Danish water sector

by the Ambassador for Denmark to Australia, His Excellency, Tom Nørring, and Ilse Korsvang, DWTG

15.30 -16.00 Groundwater and climate adaptation

Lisbeth Flindt Jørgensen, Danish Water Forum and Geological Survey of Denmark & Greenland, will start this part by giving an introduction into our work with mapping, protecting and using groundwater, and then lead the discussion following the presenters:

Climate adaptation, green infrastructure and urban liveability by Tom Patterson, Rambøll
Water modelling by Amanda Wellspring, DHI Group

16.00-16.30 Sustainable water supply

Hans-Martin Friis Møller, Kalundborg Utility, will tell you about our view on challenges and opportunities related to water supply, and then lead the discussion following the presenters:

Leakage management by Michael Ramlau Hansen, AVK
Smart metering by Mikael Hansen, Kamstrup

16.30-17.15 Energy generating wastewater treatment and emission prevention

Jens Prismus, Copenhagen Utility Biofos, will report their results on generating energy from wastewater, and then lead the discussion following the presenters:

Online measurement and control of nitrous oxide emissions from WWTPs
by Ebbe Kruse Vestergaard, Unisense Environment
Controlling emission, odor and evaporation by Cole Harvey, Hexacover
How to turn WWTPs into active energy producers by Henrik Werchmeister, VCS Denmark

After the seminar, we would be very happy to see you at our reception at the Danish booth, stand 505

Invitation

Reception at the Danish pavilion at IWA 2016

Solving global water challenges is all about knowledge sharing. Join us for a networking reception with a broad range of Danish stakeholders within the water sector. The Ambassador for Denmark to Australia, His Excellency, Tom Nørring, will take part, and this is an excellent opportunity to share and exchange knowledge and experiences between utilities, companies, researchers and other visitors.

When: Tuesday, October 11 at 17.30
Venue: Danish pavilion, stand 505

At the event, you can explore Waterville, our fantastic model of a city build of Lego. It showcases Danish state-of-the-art solutions within everything from water supply, wastewater treatment to climate adaptation.
